CAPABILITY STATEMENT

Beck Technical and Federal Solutions

HARPERSVAULT LLC d/b/a · Knoxville, Tennessee

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS
SBA VetCert pending

Equipment-specific lockout/tagout procedures, SOPs and compliance documentation, written and walkdown-verified by a former NRC-licensed reactor operator with 16 years in nuclear operations, medical accelerators and pharmaceutical commissioning.

CORE COMPETENCIES

Lockout/tagout procedures and placards. Machine-specific energy control procedures meeting OSHA 29 CFR 1910.147.

Standard operating procedures. Startup, shutdown, preventive maintenance and abnormal-condition procedures.

LOTO program audits. Gap assessments and the annual periodic inspections OSHA requires.

Training materials. Operator guides, checklists and authorized-employee training aids.

Technical documentation. Procedure and documentation support for federal and DOE facilities.

WHY BECK TECHNICAL

Nuclear-grade energy control. Trained in clearance and tagging under the strictest program in industry.

Verified in the field. Every procedure is walked down and validated with your staff before release.

Fixed-price scopes. Clear deliverables, milestone delivery and no open-ended hourly billing.

Built for audits. Procedures formatted to stand up to OSHA and internal review.

RELEVANT EXPERIENCE

Commercial nuclear power plant — 6.5 YRS
NRC-Licensed Reactor Operator; Non-Licensed Operator

Proton therapy center — 2.5 YRS
Advanced Cyclotron Operator/Technician

CAI (Commissioning Agents, Inc.) — 1 YR
Commissioning Engineer, pharmaceutical plants and labs

U.S. Navy — 6 YRS
Nuclear Propulsion Plant Operator

Training
OSHA 30-Hour, General Industry
